
Drew Galloway

*Chief, NEC Infrastructure Planning & Performance
Amtrak Northeast Corridor Infrastructure Investment & Development Dept.*

Drew Galloway is responsible for overall planning of the Northeast Corridor infrastructure and its future services, including coordination of Amtrak, eleven commuter rail operations and four major freight carriers sharing the NEC.

These activities include the partnering with states and commuter operators to advance rail investments on the NEC itself as well as on complementary connecting corridors to many points across the nation.

Drew is the chief planning architect of Amtrak's "Gateway" program to build new tunnels under the Hudson River and bring additional rail line capacity to Amtrak's busiest station in New York City and is a senior team member bringing the next generation of high speed rail service to the NEC.
